

Good day to you!

We have been fully working on the development of Easy Smart Grid since last January, with its formal creation in April 2014. Looking back to this year, we want to thank you for your support and your interest in our adventure. Over the last months, we have refined our business model, met strategic partners and investors, worked with four research institutes and developed further our solution.

We are delighted to inform you that we have recently received the initial examination report on our patent. It declares that Easy Smart Grid patent has great chances to success in its registration worldwide since no similar technology has been patented yet. This demonstrates the innovative and unique nature of our solution !

We send you our warmest thoughts and best wishes for a wonderful Holiday Season and a very Happy (and energetic) New Year!

All the best from Karlsruhe,

Marie Berger | *Finance and Marketing Manager*

## We are among three top European Start-ups in Smart Energy!

Easy Smart Grid has been awarded 3rd place in a European competition for start-up in Smart Energy. We were chosen by an independent jury of professionals: SIEMENS, Vattenfall, Deutsche Telekom etc... This confirmed our approach and the actual movement in the smart energy community toward our solution.

## 4 months, 4 events !

Since September, we did not want to miss any occasion to present our technology to German as well as international stakeholders of "smart grid" and "energy transition". From the [conference EUPVSEC](#) in Amsterdam about simplifying smart grid to our pitch by the [Idea Challenge](#) in Berlin, not to forget our booths hold by the [15. Forum Solarpraxis](#) in Berlin and by the [annual Congress](#) of the Ministry of Environment, Climate and Energy in Baden-Württemberg !

## 18/12/2014: Save the Date! We participate in the Women4Energy event (Stuttgart, Germany)

Women4energy is bringing together female researchers and female professionals from the energy and the energy related sectors. This event will be a great opportunity to exchange about our business approach and the market need.
